★TOPIC:- HARDWARE

Module_2-Day_1:

❖ Tasks:

1. **Create a table listing 3 types of printers, 2 types of scanners, and 2 types of webcams, and for each, write one real-life use case (for example: 'Inkjet printer – printing college assignments').**

⇨

❖ Types of Printers:

No.	Type of Printer	Real-Life Use Case
1	Inkjet Printer	Printing college assignments and colour photos.
2	Laser Printer	Printing office documents and reports in large quantities.
3	Dot Matrix Printer	Printing bills and invoices in shops.

❖ Types of Scanners:

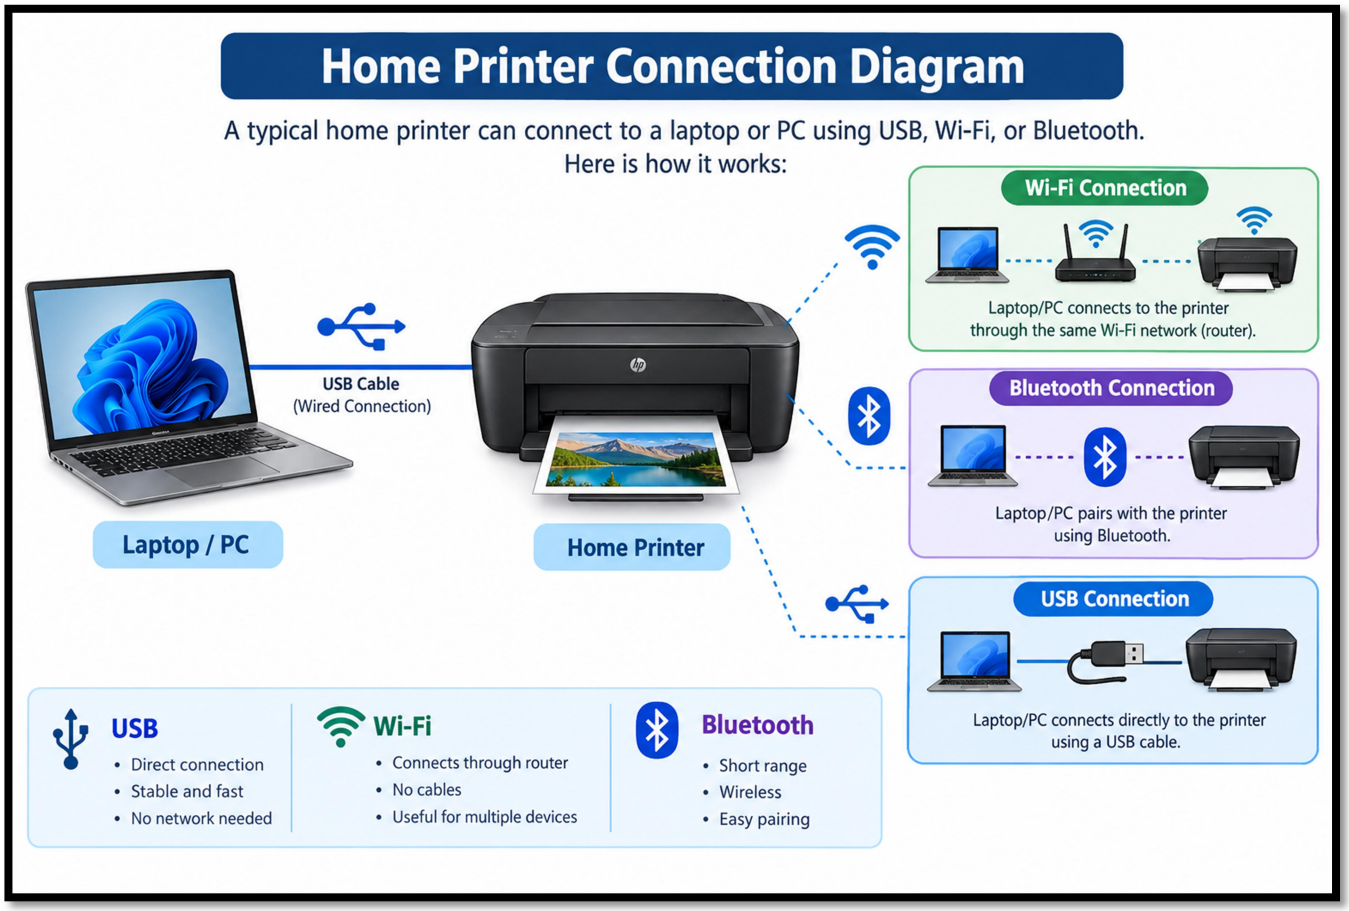

No.	Type of Scanner	Real-Life Use Case
1	Flatbed Scanner	Scanning documents, certificates, and photographs.
2	Handheld Scanner	Scanning product barcodes in shops and supermarkets.

❖ Types of Webcams:

No.	Type of Webcam	Real-Life Use Case
1	USB Webcam	Attending online classes and video meetings on a computer.
2	Built-in Webcam	Making video calls on a laptop without connecting an external camera.

2. **Draw a labeled diagram showing how a typical home printer connects to a laptop or PC, including the connection interface used (USB, Wi-Fi, or Bluetooth).**

⇨

3. **List three different connection interfaces (such as USB, Wi-Fi, Bluetooth) used by peripherals like printers, scanners, and webcams, and for each, name one advantage and one disadvantage.

Hint: Think about speed, convenience, and compatibility.**

⇨

Interface	Advantage	Disadvantage
USB (wired)	Fast, reliable, and widely compatible; plug-and-play, and it can power the device (e.g., webcams)	Needs a physical cable, which limits placement and mobility; ports can run out
Wi-Fi	Convenient; cable-free and shareable across multiple computers, phones, and tablets	More involved setup (credentials, drivers); performance depends on signal and network congestion
Bluetooth	Easy wireless pairing with low power use; no router needed, good for phones and short-range use	Slower speeds and shorter range; poor for large files or video; compatibility varies by version

4. **Pick any one device you use at home or college (printer, scanner, or webcam). Write step-by-step instructions for how you would connect it to your computer, including what cable or wireless method you would use and any setup steps required.**

⇨

❖ Connecting a Printer to a Computer Using USB:

- ★ **Device: Printer**
- ★ **Connection Type: USB Cable**

❖ Step-by-Step Instructions:

(1) Turn on the printer: Connect the printer to a power socket and switch it on.
(2) Connect the USB cable: Plug one end of the USB cable into the printer and the other end into the computer's USB port.
(3) Install the printer driver: If required, download the correct driver from the printer manufacturer's official website.
(4) Open printer settings: On Windows, go to Settings → Bluetooth & devices → Printers & scanners.
(5) Add the printer: Click Add device and select your printer from the available list.
(6) Complete the setup: Follow the on-screen instructions to finish connecting the printer.
(7) Print a test page: Open a document, press Ctrl + P, select the printer, and click Print to check whether it works correctly.
